## Accessories – Tank sampling valve

#### **Description**

The ORT and FRT valve is the tank valve used in open roof tanks and floating roof tanks. This valve allows the user to tap sample fluid from the tank. The valve has a double gasket system and a double block mechanism to reduce leakage and spill from the tank during operation.

#### **Material of construction**

The ORT and FRT is standard manufactured from AISI 316(L) material. The O-ring mounted to the piston is FKM material.
